

**CARE INSTRUCTION
FOR
DIRILYTE FLATWARE AND HOLLOWARE**

CARE OF DIRILYTE WITH BP* FINISH

DO NOT POLISH. Dirilyte with BP* does not require polishing. The finish will be damaged if polished.

WASH BY HAND in warm water using mild detergent or soap. Rinse well and dry thoroughly. By handling each piece separately, scratches will be avoided.

If Dirilyte with BP* is washed in a dishwasher, it will void the one-year warranty. Dirilyte requires the same handcare as fine china or crystal.

STORAGE: Special chests and cloths to prevent tarnish on silver may have an adverse effect on Dirilyte. Therefore, we recommend that Dirilyte should be stored in *untreated flannel wraps*.

Avoid leaving pieces in an acidic solution.

CARE OF DIRILYTE WITHOUT BP* FINISH

WASH immediately after use. This reduces tarnish from exposure to such foods as: salad dressing, eggs, mustard, butter.

WASH BY HAND in warm water using mild detergent or soap. Rinse well and dry thoroughly. Hard water in certain areas tends to increase tarnish.

Remove tarnish with Dirilyte polish as soon as it appears. Do not store tarnished pieces. This will make polishing more difficult later.

STORAGE: Special chests and cloths to prevent tarnish on silver may increase tarnish on Dirilyte. Do not store untreated Dirilyte in these chests. Use plain, *untreated flannel wraps*.

Silver or gold polish does not clean Dirilyte. Dirilyte polish is available from us.

* Bonded Protectant
